

ASTRONOMICAL EDUCATION IN PETNICA SCIENCE CENTER

Petnica Science Center is unique educational institution for science for high school students. Petnica's Department of astronomy has 2 years cycle educational program with two separated groups of student. One group are students that are for the first time on Astronomy program in Petnica. During the first year of participation they have fundamental course of astronomy, astronomical methods, working on instruments... The other group of student are the students that already been in Petnica on Astronomy program. They are working on their own research project. During the year there are 4 camps for the both groups of students. In this paper are described program and methods of astronomical education on Department of astronomy of Petnica Science center.
